Table 12. **Ablation study.** Trained on TinyImageNet with 1-step PGD and evaluated under 100-step PGD, CW, and AutoAttack (AA) with $\epsilon = 1/255$. Results are averaged over 16 datasets. Best and second-best are in **bold** and underline.

Methods	Clean	PGD	CW	AA
CLIP	64.45	0.05	4.06	0.51
$\mathcal{L}_{\text{ce}}$	43.83	29.86	29.25	28.74
$\mathcal{L}_{\text{ce}}$ + KL$(p(x)\|p(x^a))$	45.03	30.12	29.61	29.13
$\mathcal{L}_{\text{ce}}$ + KL$(p(x^a)\|p(x))$	45.05	29.98	29.28	28.80
$\mathcal{L}_{\text{ce}}$ + KL$(\text{Dir}(\alpha)\|\text{Dir}(\alpha_{adv}))$	36.72	25.01	24.66	24.36
$\mathcal{L}_{\text{ce}}$ + KL$(\text{Dir}(\alpha_{adv})\|\text{Dir}(\alpha))$	**54.17**	**32.20**	**31.41**	**30.58**

Table 13. **Zero-shot adversarial robustness across 16 single-label datasets.** All methods are fine-tuned on TinyImageNet following TGA-ZSR (Yu et al., 2024), adversarial training uses 2-step PGD (Madry et al., 2017) with $\epsilon = 1/255$. *Average* is the mean across datasets. *H* is the harmonic mean between Clean and the corresponding robust score. Best and second-best are in **bold** and underline.
